Integrated Algebra Learning Target Re-Assessment Plan

1. What Learning Targets (WINK TOPICS) would you like to be reassessed on?

In this box you should write the entire WINK topic you'd like to be reassessed on. This can be obtained from the exam or from the gradebook. Example:

IA.Q.1 – I can solve a quadratic equation by factoring and using the zero product property

2. How do you plan on learning these topics?

In this box you should write how you are going to learn what you didn't prove you learned before! Examples may include:

- Watch the video on the web site (Submit notes from the video as evidence)
- Come to Mr. Tozzo for extra help (Have Mr. Tozzo initial this form)
- Go to Academic Success Center for help (Have ASC teacher initial)
- Work with my father (Have your dad sign this form with a note and contact number)
- Other acceptable means – speak to Tozzo for OK first

3. How do you plan on practicing these topics?

In this box you should come up with your own plan as to how you are going to practice the topics you are going to reassess on. This work must be turned in with this sheet when you take the reassessment.

Acceptable practice would include:

- Problems in the text book that were not assigned – such as the even numbers from the homework.
- A worksheet created by Mr. Tozzo, the ASC or Googled and downloaded online (If not from Tozzo – get Mr. Tozzo's ok first)
- A StudyIsland assignment. You can log into StudyIsland and practice ANY TOPIC you'd like. Mr. Tozzo can then check for the Blue Ribbon.

****All work and practice must be submitted with this form on the date of the reassessment****
